LYON 2016

XIIth World Congress on earthen Architecture

11-14 July, 2016 Centre de Congrès / Lyon / France

The international congress Terra 2016 is the twelfth in a series of international events organized since 1972, bringing together academics, professionals and experts, and a broad audience gathering around earthen architecture. This edition is unique because the questions of cultural heritage and conservation and sustainable development will be considered of equal importance and treated in that way.

It is organized by CRAterre under the aegis of the ISCEAH Committee of ICOMOS International and within the framework of World Heritage Earthen Architecture Programme of UNESCO (WHEAP). About 800 participants are expected, from various complementary fields such as conservation of cultural heritage, archeology, architecture, urbanism, engineering, social sciences, as well as local development and intervention in crisis situation. The selected authors cover already over 80 nationalities and all continents; which implies a real worldwide representativeness.

Under the aegis of:

Organisation:
